

# Visual Link Internet

## Windows Vista setup instructions

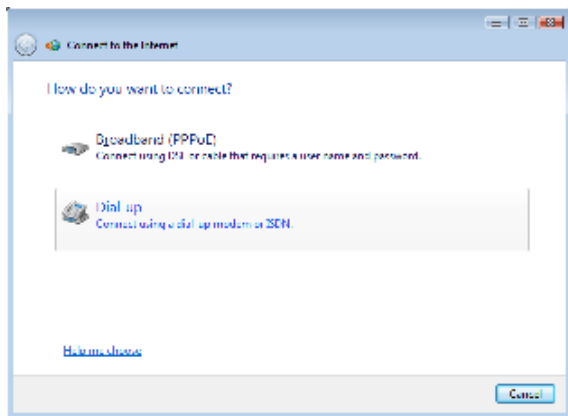

1. Click on Start then select **Control Panel**.

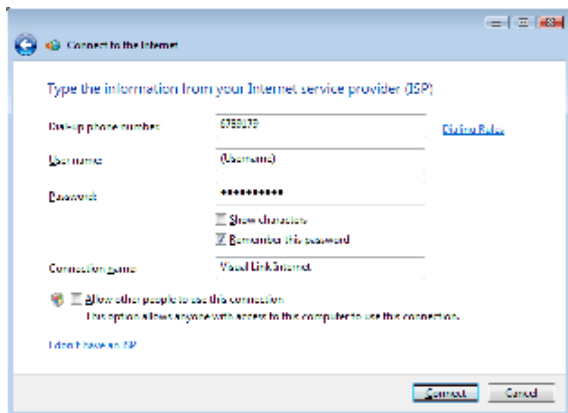

2. Under the 'Network and Internet' section, select **Connect to the Internet**.

3. Select **Dial-up** on the 'How do you want to connect' screen.

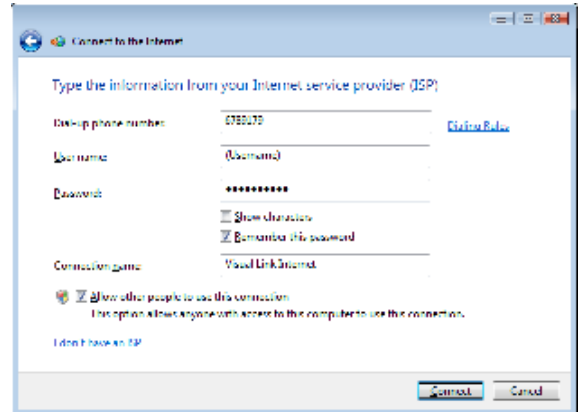

4. In the 'Type the information from your Internet service provider (ISP)' screen type **6789179** as the Dial-up phone number. Enter your User-name and Password. Finally, type Visual Link Internet for the connection name.

Hint: You may check the 'Show characters' box to check if your password was entered correctly.

5. Check the 'Allow other people to use this connection' box. You may see a window labeled 'User Account Control'. Click on **Continue**. Your screen should look the same as below.

6. In Click on **Connect** to test the connection.
7. You are now connected to the Internet. Click on **Browse the Internet now**. To connect in the Internet next time, click start, connect to, and then select **Visual Link Internet**.
